Farmers need not fear the advent of the 17-year locusts. They do no injury to growing crops, feeding on the twigs of forest and fruit trees. The locust which is so destructive to crops has jaws which cut, but the 17-year species, more properly called cicada, has only a beak through which it sucks nourishment.

The gloomy outlook of the growing corn and wheat crops is already visibly affecting the leading markets. Wheat closed yesterday at Chicago at 92 cents, corn was excited and for July and August sold at 47 1/2 and 48 cents; and August pork closed at \$10.38.
